

If you or someone you know has diabetes, this FREE offer from LifeScan will save time, money and aggravation.

Dear Friend,

It's one of life's vexing little problems.

You go to check your blood glucose ... struggle to get that hanging drop of blood perfectly in the centre of the test strip and...

... you miss the target or get that annoying "NOT ENOUGH BLOOD" error message. And have to start all over again. Wasting a test strip. Wasting time. Not to mention the pain and aggravation of having to prick your finger all over again.

But not anymore. Call this toll-free number right now **1-800-663-5621 Ext. 55** and we'll send you a new type of meter that solves these problems. It's called the LifeScan SureStep ... and we'll send you one FREE (a \$90.00 retail value) to try for 30 days. At no obligation.

See how the SureStep, with its unique "touchable" test strips and Confirmation Dot, can make testing your blood the most foolproof process you've ever experienced.

If you like it, keep it! There's nothing to buy. Simply trade in your old meter, regardless of age or condition. We'll even pay the return postage. Or you can send back the SureStep at our expense. What could be fairer?

Take us up on our offer soon, while supplies last. Call the toll-free number. You have nothing to lose and a brand new meter to gain!

Sincerely,

LifeScan Representative
